## OPERATOR'S MANUAL Vac Attack II Blower / Vacuum ZR08107

Your blower has been engineered and manufactured to Homelite's high standard for dependability, ease of operation, and operator safety. Properly cared for, it will give you years of rugged, trouble-free performance.

**WARNING:** To reduce the risk of injury, the user must read and understand the operator's manual before using this product.

Thank you for buying a Homelite blower.

## INTRODUCTION

With the Vac Attack II Blower, clearing leaves, pine needles and other debris from your lawn, driveway, or deck will be a breeze. Safety, performance, and dependability have been given top priority in the design of this blower making it easy to maintain and operate.

# GENERAL SAFETY RULES

## WARNING:

Read and understand all instructions. Failure to follow all instructions listed below may result in electric shock, fire and/or serious personal injury.

- Do not allow children or untrained individuals to use this unit.
- Never start or run the engine inside a closed area; breathing exhaust fumes can kill.
- Wear eye protection which is marked to comply with ANSI Z87.1 as well as hearing protection when operating this equipment.
- Keep all bystanders, children, and pets at least 50 feet (15 m) away.
- Wear heavy long pants, boots, and gloves. Do not wear loose fitting clothing, short pants, jewelry of any kind, or go barefoot.
- To reduce the risk of injury associated with objects being drawn into rotating parts, do not wear loose clothing, scarves, neck chains, and the like. Secure long hair so it is above shoulder level to prevent entanglement in any rotating parts.
- Do not operate this unit when you are tired, ill, or under the influence of alcohol, drugs, or medication.
- Do not operate in poor lighting.
- Keep all parts of your body away from any moving parts and all hot surfaces of the unit.
- Wear a face filter mask in dusty conditions to reduce the risk of injury associated with the inhalation of dust.
- Check the work area before each use. Remove all objects such as rocks, broken glass, nails, wire, or string which can be thrown or become entangled in the machine.
- Keep firm footing and balance. Do not overreach. Overreaching can result in loss of balance or exposure to hot surfaces.
- Never operate the unit without a spark arrestor screen; this screen is located inside the muffler.
- Product users on United States Forest Service land, and in some states, must comply with fire prevention regulations. This product is equipped with a spark arrestor; however, other user requirements may apply. Check with the federal, state, or local authorities in your area.
- Before storing, allow the engine to cool.
- Empty fuel tank and restrain the unit from moving before transporting in a vehicle.
- To reduce the risk of fire and burn injury, handle fuel with care. It is highly flammable.
- Do not smoke while handling fuel.
- Mix and store fuel in a container approved for gasoline.
- Mix fuel outdoors where there are no sparks or flames.
- Select bare ground, stop engine, and allow to cool before refueling.
- Loosen fuel cap slowly to release pressure and to keep fuel from escaping around the cap.
- Tighten the fuel cap securely after refueling.
- Wipe spilled fuel from the unit. Move 30 feet (9 m) away from refueling site before starting engine.
- Never attempt to burn off spilled fuel under any circumstances.
- Use only Homelite replacement parts and accessories. Failure to do so may cause poor performance, possible injury.
- Maintain the unit per maintenance instructions in this Operator's Manual.
- Inspect the unit before each use for loose fasteners, fuel leaks, etc. Replace damaged parts.

## SPECIFIC SAFETY RULES

- Do not operate vacuum without vacuum bag installed; flying debris could cause serious injury. Always close vacuum bag completely before operating.
- Always hold the blower in your right hand, refer to the “Operation Instructions,” later in this manual for additional information.
- To reduce the risk of hearing loss associated with sound level(s), hearing protection is required.
- Rotating impeller blades can cause severe injury. Stop the engine before opening the vacuum door or installing / changing tubes. Do not put hands or any other object into the vacuum tubes while they are installed on the unit.
- To reduce the risk of injury associated with contacting rotating parts, stop the engine before installing or removing attachments. Do not operate without guard(s) in place. Always disconnect the spark plug before performing maintenance or accessing any movable parts.
- Do not point the blower nozzle in the direction of people or pets.
- Never run the unit without the proper equipment attached. When used as a blower, always install the blower tubes. When used as a vacuum, always install the vacuum tubes and vacuum bag. Make sure the vacuum bag is completely zipped when the unit is running to avoid flying debris.
- Avoid situations that could catch the vacuum bag on fire. Do not operate near an open flame. Do not vacuum warm ash from fireplaces, barbeque pits, brush piles, etc. Do not vacuum discarded cigars or cigarettes unless the cinders are completely cool.

# SYMBOLS

Some of the following symbols may be used on this tool. Please study them and learn their meaning for safe operation of this product.

SYMBOL	NAME	EXPLANATION
	Safety Alert Symbol	Precautions that involve your safety.
	Read the Operator's Manual	To reduce the risk of injury, user must read and understand operator's manual before using this product.
	Wear Eye and Hearing Protection	Wear eye protection which is marked to comply with ANSI Z87.1 as well as hearing protection when operating this equipment.
	Vacuum Door	Do not run unit while vacuum door is unsecured.
	Blower Tubes	Do not operate without tubes in place.
	Long Hair	Risk of long hair being drawn into air inlet.
	Loose Clothing	Risk of loose clothing being drawn into air intake.

# SYMBOLS

The following signal words and meanings are intended to explain the levels of risk associated with this product.

SYMBOL	SIGNAL	MEANING
	<b>DANGER:</b>	Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.
	<b>WARNING:</b>	Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.
	<b>CAUTION:</b>	Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.
	<b>CAUTION:</b>	(Without Safety Alert Symbol) Indicates a situation that may result in property damage.

## SERVICE

Servicing requires extreme care and knowledge and should be performed only by a qualified service technician. For service we suggest you return the product to your nearest **AUTHORIZED SERVICE DEALER** for repair. When servicing, use only identical replacement parts.

### **WARNING:**

Observe all normal safety precautions related to avoid electrical shock.

### **WARNING:**

To avoid serious personal injury, do not attempt to operate this product until you read thoroughly and understand completely the operator's manual. Save this operator's manual and review frequently for continuing safe operation and instructing others who may use this product.

### **WARNING:**

The operation of any products can result in foreign objects being thrown into your eyes, which can result in severe eye damage. Before beginning operation, always wear safety goggles or safety glasses with side shields and a full face shield when needed. We recommend Wide Vision Safety Mask for use over eyeglasses or standard safety glasses with side shields. Always wear eye protection which is marked to comply with ANSI Z87.1.

## SAVE THESE INSTRUCTIONS

# FEATURES

## SPECIFICATIONS

Weight .....	10.4 lbs. (4.7 kg.)
Engine displacement .....	30cc
Air Velocity:	
MPH .....	200
CFM .....	420

Before using this blower, familiarize yourself with all operating features and safety requirements. However, do not let familiarity with the blower make you careless.

This new blower is equipped with the following features. See *Figures 1a and 1b*.

### MOTOR

The blower has a powerful 30cc engine with sufficient power to handle tough blowing and vacuuming jobs.

### THROTTLE TRIGGER

The blower can be operated at any speed between idle and full throttle.

### CRUISE CONTROL / THROTTLE LOCK

The **Cruise control** (throttle lock) feature allows the user to operate the blower without holding the throttle trigger. To stop the engine, simply push the Cruise control knob after the engine has returned to idle speed.

### BLOWER TUBE AND NOZZLE

The blower tubes can be assembled and installed on the blower using no tools.

### WIDE SWEEPER NOZZLE

The wide sweeper nozzle allows for more area to be covered during blower operation.

### HIGH VELOCITY NOZZLE

The high velocity nozzle is great for wet sticky leaves. It allows you to scrape wet leaves or debris while operating the blower.

### VACUUM

The blower will convert to a powerful vacuum/mulcher using no tools.

### VACUUM BAG

The vacuum bag attaches to the blower easily using the vacuum bag adaptor.

### VACUUM TUBES

The vacuum tubes can be installed on the blower without using any tools.

### MULCHER

The blower is equipped with a mulcher feature that efficiently reduces leaves at a 12:1 ratio.

# FEATURES

Fig. 1b

## INSTRUCTIONS

When unpacking the blower:

- Carefully remove the blower and accessories from the box
- Make sure that all items listed in the packing list are included.
- Inspect the blower carefully to make sure no breakage or damage occurred during shipping.
- Do not discard the packing material until you have carefully inspected and satisfactorily operated the blower.
- If any parts are damaged or missing, please call 1-800-242-4672 for assistance.

### **!** WARNING:

If any parts are missing do not operate the blower until the missing parts are replaced. Failure to do so could result in possible serious personal injury.

## PACKING LIST

Blower  
Upper Blower Tube  
Wide Sweeper Nozzle  
High Velocity Nozzle  
Upper and Lower Vacuum Tubes  
Vacuum Bag  
Vacuum Bag Adaptor  
Tube Clamp  
Operator's Manual

**NOTE:** Read and remove all hang tags and store with your operator's manual.

# ASSEMBLY

## **⚠ WARNING:**

Stop the engine and disconnect the spark plug wire before installing parts, making adjustments, cleaning, or when not in use. Failure to do so could result in possible serious personal injury.

### **ASSEMBLING THE BLOWER TUBES**

See Figure 2.

1. Screw the nozzle onto the upper blower tube and tighten securely. Check tightness after initial run and retighten if needed.
2. Place clamp around the neck of the blower housing outlet. Do not tighten the wing nut yet.
3. Align the locking tab on upper blower tube with the slot in the blower housing outlet; push the tube into the housing. Twist to lock into place.
4. Rotate the tube so the nozzle is pointing upward as shown. Tighten the wing nut securely.
5. To remove the tubes, loosen the wing nut on the clamp. Rotate the tubes to unlock them remove from the blower housing outlet.

### **INSTALLING THE VACUUM BAG**

See Figures 3 and 4.

1. Remove the nozzle and upper blower tube from the blower.
2. Unzip the vacuum bag and place the adaptor inside as shown.
3. Align the locking tab on the bag adaptor with the slot in the blower housing outlet; push the bag adaptor into the housing. Twist to lock into place.
4. Tighten the wing nut securely.
5. Rotate the vacuum bag until the shoulder strap is upright.
6. Make sure the vacuum bag is zipped and closed before starting the unit.

Fig. 2

Fig. 3

Fig. 4

# ASSEMBLY

## **⚠ WARNING:**

Stop the engine and disconnect the spark plug wire before installing parts, making adjustments, cleaning, or when not in use. Failure to do so could result in possible serious personal injury.

## **INSTALLING THE VACUUM TUBES**

See Figures 5 and 6.

### **To install the vacuum tubes:**

1. Screw the upper and lower vacuum tubes together and tighten securely.
2. Loosen the door knob on the inlet cover door and open. Place the notch in the support arm of the upper vacuum tube under the hinge of the inlet cover door.
3. Push the upper vacuum tube into the blower housing.
4. Align the upper vacuum tube knob with the hole in the housing and tighten securely.

### **To remove the vacuum tubes:**

1. Loosen the upper vacuum tube knob.
2. Remove the vacuum tubes from the blower housing.
3. Close the inlet cover door and tighten the door knob securely.

Fig. 5

Fig. 6

# OPERATION

## WARNING:

Gasoline is extremely flammable and explosive. A fire or explosion from gasoline will burn you and others.

## MIXING THE FUEL

This product is powered by a 2-cycle engine and requires pre-mixing gasoline and 2-cycle oil. The mixture should be at a 50:1 ratio, using Premium Exact Mix™ 2-cycle engine oil. If Premium Exact Mix™ 2-cycle engine oil is not available, use a high quality 2-cycle engine oil, mixed at a 50:1 ratio. See chart later in this section.

### To mix the fuel:

1. Use a clean container that is approved for use with gasoline.
2. Mix the Premium Exact Mix™ 2-cycle engine oil with unleaded gasoline in the container, according to the instructions on the oil package.

### IMPORTANT:

This engine is certified to operate on unleaded gasoline intended for automotive use with an octane rating of 87  $([R + M] / 2)$  or higher. Do not use automotive oil or 2-cycle outboard oil.

### NOTE:

Premium Exact Mix™ fuel mixture will stay fresh up to 30 days. DO NOT mix quantities larger than usable in a 30 day period.

### PREMIUM EXACT MIX™ (50:1)

GASOLINE	OIL
1 gallon (US)	2.6 oz.
1 Liter	20 cc (20 ml)

## FILLING THE TANK

## WARNING:

Always stop the engine before filling the fuel tank. Never add fuel to a machine with a running or hot engine. Move at least 30 ft. (9 m) from the refueling area before starting engine. Do not smoke while filling the tank.

1. Clean the surface around the fuel cap to prevent contamination.
2. Loosen the fuel cap slowly, by turning it counterclockwise.
3. Pour the fuel mixture carefully into the tank.
4. Clean and inspect the fuel cap gasket before replacing the fuel cap.
5. Replace the fuel cap and tighten it by turning it clockwise.
6. Wipe spilled fuel from the product.
7. Move at least 30 ft. (9 m) away from refueling area before starting the product.

**NOTE:** It is normal for smoke to be emitted from a new engine during first use.

## WARNING:

Check for fuel leaks. If you find any leaks, correct the problem before using the product.

## WARNING:

A leaking fuel cap is a fire hazard and must be replaced immediately.

# OPERATION

## STARTING AND STOPPING

See Figure 7.

Starting the product differs depending on whether the engine is cold or warm. Refer to the label on the air filter base for choke positions **A**, **B**, and **C**.

### TO START A COLD ENGINE:

1. Place the blower on a flat, bare surface.
2. Push the primer bulb, slowly, 5 times.
3. Move the choke lever to the full choke position marked **A**.
4. Squeeze the throttle trigger to full throttle position.
5. Pull the starter rope until the engine tries to run. Do not pull the starter rope more than 6 pulls.
6. Move the choke lever to the half choke position marked **B**.
7. Squeeze the trigger to full throttle position and pull the starter rope until the engine runs.
8. Run the engine 30 to 45 seconds at full throttle in the half choke position, to warm up the engine.
9. Move the choke lever to position marked **C**.

### TO START A WARM ENGINE:

1. Push the primer bulb, slowly, 5 times.
2. Move the choke lever to the half choke position marked **B**.
3. Squeeze the trigger to full throttle position and pull the starter rope until the engine runs.
4. Move the choke lever to position marked **C**.

### TO STOP:

See Figure 8.

Release the throttle trigger and push the **STOP** knob until the engine stops.

## OPERATING THE BLOWER

See Figure 9.

- Start the blower, refer to “Starting and Stopping” earlier in this manual. Hold the blower with the upper handle in your right hand.
- To keep from scattering debris, blow around the outer edges of a debris pile. Never blow directly into the center of a pile.
- Operate power equipment at reasonable hours only - not early in the morning or late at night when people might be disturbed. Comply with the times listed in local ordinances.
- To reduce sound levels, limit the number of pieces of equipment used at any one time.

Fig. 7

Fig. 8

### **!** WARNING:

Keep away from all hot surfaces of the blower. Failure to do so could result in possible serious personal injury.

Fig. 9

# OPERATION

- Operate blower at the lowest possible throttle speed to do the job.
- Check your equipment before operation, especially the muffler, air intakes and air filters.
- Use rakes and brooms to loosen debris before blowing.
- In dusty conditions, slightly dampen surfaces when water is available.
- Conserve water by using power blowers instead of hoses for many lawn and garden applications, including areas such as gutters, screens, patios, grills, porches and gardens.
- Watch out for children, pets, open windows or freshly washed cars, and blow debris safely away.
- Use the full blower nozzle extension so the air stream can work close to the ground.
- After using blowers or other equipment, CLEAN UP! Dispose of debris in trash receptacles.
- Use the wide sweeper nozzle for the everyday blowing operation. This nozzle allows for more area to be covered during the blowing operation. *See Figure 10.*
- The high velocity nozzle is great for wet sticky leaves. It allows you to scrape wet leaves or debris while operating the blower. *See Figure 10.*

## CRUISE CONTROL (THROTTLE LOCK)

The cruise control (throttle lock) can be used to operate the blower without holding the throttle trigger.

**TO ENGAGE THE CRUISE CONTROL (Throttle Lock):**  
*See Figure 11.*

1. Turn the Cruise control knob clockwise, toward the back of the blower, and stop at the desired throttle setting.
2. To release the Cruise control, depress and release the throttle trigger.

## VACUUM OPERATION

*See Figure 12.*

- Install the vacuum tubes and bag, refer to “Installing the Vacuum Bag” and “Installing the Vacuum Tubes” earlier in this manual.
- Start the blower, refer to “Starting and Stopping” earlier in this manual.
- Place the leaf bag strap over the head and onto the left shoulder. Hold the upper handle in your right hand and the lower handle in your left hand.
- Move the blower from side to side along outer edge of the debris. To avoid clogging, do not place the vacuum tube directly into the debris pile.

Fig. 10

Fig. 11

## OPERATION

- Hold the engine higher than the inlet end of the vacuum tube.
- Always point vacuum tube downhill when working on a hillside.
- To avoid injury to the operator or unit, do not pick up rocks, broken glass, bottles, or other similar objects.
- If the vacuum tubes should clog, stop the engine and disconnect the spark plug wire before cleaning out the obstruction.
- Remove the vacuum tubes and clear the debris from the blower fan housing. Remove the bag and clear the tube. A small rod or stick may be required to clear the entire tube length. Ensure that all debris has been cleared before reassembling the vacuum tubes.

Fig. 12

## MAINTENANCE

### WARNING:

Use only original manufacturer's replacement parts, accessories and attachments. Failure to do so can cause possible injury, poor performance and may void your warranty.

### REPLACING AND CLEANING THE AIR FILTER

See Figure 13.

For proper performance and long life, keep air filter clean.

1. Push down on the latch of the air filter cover; carefully pull the top of the air filter cover so it pivots away from the base.
2. Remove the air filter and clean it in warm soapy water. Rinse and let dry completely. For best performance, replace the air filter annually.
3. Reinstall the air filter into the air filter base.
4. Pivot the cover back in place. Push the latch back into the slot and ensure the cover is locked in place.

Fig. 13

# MAINTENANCE

## SPARK ARRESTOR

The muffler is equipped with a spark arrestor screen inside muffler body. After extended use the screen can become dirty and may need to have the muffler replaced by an authorized servicing dealer.

### **WARNING:**

To avoid a fire hazard, never run the blower without the spark arrestor in place.

## CLEANING THE EXHAUST PORT AND MUFFLER

Depending on the type of fuel used, the type and amount of oil used, and/or your operating conditions, the exhaust port and muffler may become blocked with carbon deposits. If you notice low power from the blower, have a qualified service technician check the exhaust port and muffler for carbon deposits. Removing the carbon deposits should restore performance to the blower.

## VACUUM BAG

A dirty bag will reduce performance. To clean the bag, turn it inside out and shake. Wash the bag in soapy water at least once a year. If the bag has deteriorated from normal use, obtain a replacement bag from your authorized servicing dealer.

## FUEL CAP

### **WARNING:**

A leaking fuel cap is a fire hazard and must be replaced immediately.

The fuel cap contains a non-serviceable filter and a check valve. A clogged fuel filter will cause poor engine performance. If performance improves when the fuel cap is loosened, the check valve may be faulty or filter clogged. Replace the fuel cap if required.

## SPARK PLUG

This engine uses a Champion RCJ-6Y with 0.63 mm (0.025 in.) electrode gap. Use an exact replacement and replace annually.

## STORAGE (1 MONTH OR LONGER)

- 1 Drain all fuel from the tank into a container approved for gasoline. Run engine until it stops.
- 2 Clean all foreign material from the blower. Store it in a well-ventilated place that is inaccessible to children. Keep away from corrosive agents such as garden chemicals and de-icing salts.
- 3 Abide by all Federal and local regulations for the safe storage and handling of gasoline. Excess fuel should be used up in other 2-cycle engine powered equipment.

# TROUBLESHOOTING

**IF THESE SOLUTIONS DO NOT SOLVE THE PROBLEM CONTACT YOUR AUTHORIZED SERVICING DEALER.**

PROBLEM	POSSIBLE CAUSE	SOLUTION
Engine will not start:	<ol style="list-style-type: none"> <li>1. No spark.</li> <li>2. No fuel.</li> <li>3. Flooded engine.</li> <li>4. Starter rope pulls harder now than when new.</li> </ol>	<ol style="list-style-type: none"> <li>1. Check spark. Remove spark plug. Reattach the spark plug cap and lay spark plug on metal cylinder. Pull the starter rope and watch for spark at spark plug tip. If there is no spark, repeat test with a new spark plug.</li> <li>2. Push primer bulb until fuel is visible in the bulb. If fuel is not apparent, the primary fuel delivery system is blocked. Contact a servicing dealer. If primer bulb fills, engine may be flooded (see next item).</li> <li>3. Remove spark plug, turn blower so spark plug hole is aimed at the ground. Move choke lever to "RUN" and pull starter cord 10 to 15 times. This will clear excess fuel from engine. Clean and reinstall spark plug. Pull starter three times with choke lever at "RUN". If engine does not start, move choke lever to "CHOKE" and repeat normal starting procedure. If engine still fails to start, repeat procedure with a new spark plug.</li> <li>4. Contact a servicing dealer.</li> </ol>
Engine starts but will not accelerate:	Carburetor requires adjustment.	Turn "L" needle <b>counterclockwise</b> 1/16 turn. If "L" low needle can not be turned counterclockwise, do not force plastic limiter caps. Contact a servicing dealer. <i>See Figure 14.</i>
Engine starts but will only run at high speed at half choke:	Carburetor requires adjustment.	Turn "H" needle <b>counterclockwise</b> 1/16 turn. If "H" high needle can not be turned counterclockwise, do not force plastic limiter caps. Contact a servicing dealer. <i>See Figure 14.</i>
Engine does not reach full speed and emits excessive smoke:	<ol style="list-style-type: none"> <li>1. Oil / fuel mixture is incorrect.</li> <li>2. Air filter is dirty.</li> <li>3. Carburetor requires adjustment.</li> <li>4. Spark arrestor screen is dirty.</li> </ol>	<ol style="list-style-type: none"> <li>1. Use fresh fuel and the correct 2-cycle oil mix.</li> <li>2. Clean air filter, refer to "Replacing and Cleaning the Air Filter" earlier in this manual.</li> <li>3. Turn "H" (B) needle clockwise 1/16 turn. <i>See Figure 14.</i></li> <li>4. Contact a servicing dealer.</li> </ol>
Engine starts, runs, and accelerates but will not idle:	Carburetor requires adjustment.	Turn idle speed screw clockwise to increase idle speed. <i>See Figure 14.</i>

**NOTE:** The carburetor adjustment needle(s) are equipped with plastic cap(s) that prevents counterclockwise rotation from the original factory adjustment. If your unit exhibits specific performance problem(s) where the Trouble Shooting Section recommends a counterclockwise needle adjustment and no adjustments have been made since original purchase, the unit should be taken to a factory authorized service dealer for repair. In most cases, the needed adjustment is a simple task for the factory trained service representative.

# WARRANTY

## RECONDITIONED PRODUCTS LIMITED WARRANTY

**Homelite Consumer Products, Inc.** warrants to the original retail purchaser that this **HOMELITE** product is free from defect in material and workmanship and agrees to repair or replace, at Homelite Consumer Products, Inc.'s discretion, any defective product free of charge within these time periods from the date of purchase.

- One year, if the Product is used for personal, family, or household use;
- 90 days, if the Product is used for any other purpose, such as commercial or rental use.

This warranty extends to the original retail purchaser only and commences on the date of the original retail purchase.

Any part of the **HOMELITE** product manufactured or supplied by **HOMELITE** and found in the reasonable judgment of **HOMELITE** to be defective in material or workmanship will be repaired or replaced by an authorized **HOMELITE** service dealer without charge for parts and labor.

The **HOMELITE** product including any defective part must be returned to an authorized service dealer within the warranty period. The expense of delivering the **HOMELITE** product to the dealer for warranty work and the expense of returning it back to the owner after repair or replacement will be paid by the owner. **HOMELITE'S** responsibility in respect to claims is limited to making the required repairs or replacements and no claim of breach of warranty shall be cause for cancellation or rescission of the contract of sale of any **HOMELITE** product. Proof of purchase will be required by the dealer to substantiate any warranty claim. All warranty work must be performed by an authorized **HOMELITE** service dealer.

This warranty is limited to ninety (90) days from the date of original retail purchase for any **HOMELITE** product that is used for rental or commercial purposes, or any other income-producing purpose.

This warranty does not cover any **HOMELITE** product that has been subject to misuse, neglect, negligence, or accident, or that has been operated in any way contrary to the operating instructions as specified in the **HOMELITE** operator's manual. This warranty does not apply to any damage to the **HOMELITE** product that is the result of improper maintenance or to any **HOMELITE** product that has been altered or modified. The warranty does not extend to repairs made necessary by normal wear or by the use of parts or accessories which are either **INCOMPATIBLE WITH THE HOMELITE** product or adversely affect its operation, performance or durability.

In addition, this warranty does not cover:

- A. Tune-ups – Spark Plugs, Carburetor, Carburetor Adjustments, Ignition, Filters
- B. Wear items – Bump Knobs/Spool Retainers, Outer Spools, Cutting Lines, Inner Reels, Starter Pulley, Starter Ropes, Drive Belts

**HOMELITE** reserves the right to change or improve the design of any **HOMELITE** product without assuming any obligation to modify any product previously manufactured.

ALL IMPLIED WARRANTIES ARE LIMITED IN DURATION TO THE STATED WARRANTY PERIOD. ACCORDINGLY, ANY SUCH IMPLIED WARRANTIES INCLUDING MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR OTHERWISE, ARE DISCLAIMED IN THEIR ENTIRETY AFTER THE EXPIRATION OF THE APPROPRIATE TWO-YEAR, ONE-YEAR, OR NINETY DAY WARRANTY PERIOD. **HOMELITE'S** OBLIGATION UNDER THIS WARRANTY IS STRICTLY AND EXCLUSIVELY LIMITED TO THE REPAIR OR REPLACEMENT OF DEFECTIVE PARTS AND **HOMELITE** DOES NOT ASSUME OR AUTHORIZE ANYONE TO ASSUME FOR THEM ANY OTHER OBLIGATION. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. **HOMELITE** ASSUMES NO RESPONSIBILITY FOR INCIDENTAL, CONSEQUENTIAL OR OTHER DAMAGES INCLUDING, BUT NOT LIMITED TO EXPENSE OF RETURNING THE **HOMELITE** PRODUCT TO AN AUTHORIZED SERVICE DEALER AND EXPENSE OF DELIVERING IT BACK TO THE OWNER, MECHANIC'S TRAVEL TIME, TELEPHONE OR TELEGRAM CHARGES, RENTAL OF A LIKE PRODUCT DURING THE TIME WARRANTY SERVICE IS BEING PERFORMED, TRAVEL, LOSS OR DAMAGE TO PERSONAL PROPERTY, LOSS OF REVENUE, LOSS OF USE OF THE PRODUCT, LOSS OF TIME, OR INCONVENIENCE, SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

This warranty gives you specific legal rights, any you may also have other rights which vary from state to state.

This warranty applies to all **HOMELITE** products manufactured by **HOMELITE** and sold in the United States and Canada.

To locate your nearest service dealer, dial 1-800-242-4672 or log on to our website at [www.homelite.com](http://www.homelite.com).

# WARRANTY

**THE FOLLOWING CARB STATEMENT ONLY APPLIES TO MODEL NUMBERS REQUIRED TO MEET (CARB) REQUIREMENTS.**

## **HOMELITE CONSUMER PRODUCTS, INC. LIMITED WARRANTY FEDERAL AND CALIFORNIA EMISSION CONTROL SYSTEMS NONROAD AND SMALL OFF-ROAD ENGINES**

The U.S. Environmental Protection Agency (EPA), the California Air Resources Board (CARB), and Homelite Consumer Products, Inc. are pleased to explain the Emission Control System Warranty on your nonroad or small off-road engine. In California, new small off-road engines must be designed, built and equipped to meet the state's stringent anti-smog standards. In other states, new 2000 and later model year nonroad engines must be designed, built and equipped, at the time of sale, to meet the U.S. EPA regulations for small nonroad engines. The nonroad engine must be free from defects in materials and workmanship which cause it to fail to conform with U.S. EPA standards for the first one year of engine use from the date of sale to the ultimate purchaser. Homelite Consumer Products, Inc. must warrant the emission control system on your nonroad or small off-road engine for the period of time listed above provided there has been no abuse, neglect, or improper maintenance of your nonroad or small off-road engine.

Your emission control system may include parts such as the carburetor or fuel injection system, the ignition system, the catalytic converter. Also included may be hoses, belts, and connectors and other emission related assemblies.

Where a warrantable condition exists, Homelite Consumer Products, Inc. will repair your nonroad or small off-road engine at no cost to you, including diagnosis (if the diagnostic work is performed at an authorized dealer), parts, and labor.

### **MANUFACTURER'S WARRANTY COVERAGE:**

The 1995 and later small off road engines are warranted for one year in California. In other states, 1997 and later model year nonroad engines are also warranted for one year. If any emission-related part on your engine is defective, the part will be repaired or replaced by Homelite Consumer Products, Inc. free of charge.

### **OWNER'S WARRANTY RESPONSIBILITIES**

- (a) As the nonroad or small off-road engine owner, you are responsible for the performance of required maintenance listed in your owner's manual. Homelite Consumer Products, Inc. recommends that you retain all receipts covering maintenance on your nonroad or small off-road engine, but Homelite Consumer Products, Inc., cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance. Any replacement part or service that is equivalent in performance and durability may be used in non-warranty maintenance or repairs, and shall not reduce the warranty obligations of the engine manufacturer.
- (b) As the nonroad or small off-road engine owner, you should be aware, however, that Homelite Consumer Products, Inc., may deny you warranty coverage if your nonroad or small off-road engine or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications.
- (c) You are responsible for presenting your nonroad or small off-road engine to a Homelite Consumer Products, Inc., service dealer as soon as a problem exists. The warranty repairs should be completed in a reasonable amount of time, not to exceed 30 days.

If you have any questions regarding your warranty rights and responsibilities, you should contact a Homelite Consumer Products, Inc., Customer Representative at 1-800-242-4672.

### **COVERAGE:**

Homelite Consumer Products, Inc. warrants to the ultimate purchaser and each subsequent purchaser that your nonroad or small off-road engine will be designed, built and equipped, at the time of sale, to meet all applicable regulations. Homelite Consumer Products, Inc. also warrants to the initial purchaser and each subsequent purchaser that your nonroad or small off-road engine is free from defects in materials and workmanship which cause the engine to fail to conform with applicable regulations for a period of one year. The 1995 and later small off road engines are warranted for one year in California. In all other states for 1997 and later model years, EPA requires manufacturers to warrant non-road engines for one year. These warranty periods will begin on the date the nonroad or small off-road engine is purchased by the initial purchaser. If any emission-related part on your engine is defective, the part will be replaced by Homelite Consumer Products, Inc. at no cost to the owner.

Homelite Consumer Products, Inc. shall remedy warranty defects at any authorized Homelite Consumer Products, Inc. engine dealer or warranty station. Any authorized work done at an authorized dealer or warranty station shall be free of charge to the owner if such work determines that a warranted part is defective. Any manufacturer-approved or equivalent replacement part may be used for any warranty maintenance or repairs on emission-related parts, and must be provided free of charge to the owner if the part is still under warranty. Homelite Consumer Products, Inc. is liable for damages to other engine components caused by the failure of a warranted part still under warranty.

The California Air Resources Board's Emission Warranty Parts List specifically defines the emission-related warranted parts. (EPA's regulations do not include a parts list, but EPA considers emission-related warranted parts to include all the parts listed below.)

These warranted parts are: Carburetor, Spark Plug, Ignition, Air Filter and Fuel Filter.

### **MAINTENANCE REQUIREMENTS**

The owner is responsible for the performance of the required maintenance as defined by Homelite Consumer Products, Inc. in the operator's manual.

### **LIMITATIONS**

The Emission Control Systems Warranty shall not cover any of the following:

- (a) repair or replacement required because of misuse or neglect, lack of required maintenance, repairs improperly performed or replacements not conforming to Homelite Consumer Products, Inc. specifications that adversely affect performance and/or durability, and alterations or modifications not recommended or approved in writing by Homelite Consumer Products, Inc., and
- (b) replacement of parts and other services and adjustments necessary for required maintenance at and after the first scheduled replacement point.

The Emissions Compliance Period referred to on the Emissions Compliance label indicates the number of operating hours for which the engine has been shown to meet Federal emission requirements. Category C=50 hours, B=125 hours, and A=300 hours.
