

## SDIO 802.11b Wireless LAN Card

### Compact Form Factor Adapter for Mobile Computing

The **SDW11b** is a compact size wireless card for the PDA and other mobile computing device. The card is designed in the concept to get friendly with battery. When connected to a WLAN, the card is typically in listening mode almost the time except the short period of packet being transmitted and received. That means your battery life will be maximized.

The card works with a lot of wireless LAN security protocols. Open, 64-bit and 128-bit WEP encryptions are supported.
