

USB 2.0 Mobile KeyDrive Flash Drive

The USB 2.0 Mobile KeyDrive™ allows you to take your files anywhere in the palm of your hand. Great for storing and transferring your MP3's, digital photos, games, spreadsheets, documents, presentations or any personal files from your computer. You can even run an entire presentation from the Mobile KeyDrive. The USB 2.0 interface is blazing fast with speeds up to 40 times faster than USB 1.1 and storage capacities are available up to 1GB (gigabyte). It's Windows® and Mac OS® compatible and does not require any drivers (except for Windows 98).

This ultra-thin USB design is as thin as a house key and only 1.69" long. The Mobile KeyDrive gives you the freedom to take your favorite files on the go without taking up space in your pocket. It also includes a key ring strap with an easy detachable switch. Go Mobile!
